NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS

For the three months ended June 30, 2020 and 2019

(Expressed in Canadian dollars)

1. NATURE OF OPERATIONS

Tudor Gold Corp. (the “Company”) was incorporated under the Business Corporations Act (Alberta) on January 20, 2010. On April 28, 2016, the Company was continued from the Province of Alberta to the Province of British Columbia. The Company is listed on the TSX Venture Exchange (“TSX-V”) under the trading symbol “TUD”. The Company is a junior resource exploration company that is involved in the acquisition and exploration of mineral properties in Canada.

The head office and principal business address of the Company is Suite 205 – 837 West Hastings St., Vancouver, BC, V6C 3N6.

As at June 30, 2020, the Company had working capital of \$6,834,612. Subsequent to the period ended June 30, 2020, management completed a private placement financing (Note 16) to provide it with sufficient capital for the next 12 months or longer. The Company has no source of operating cash flows and as such the Company’s ability to continue as a going concern is contingent on its ability to monetize assets or obtain additional financing. There can be no assurance that the Company will be able to obtain adequate financing or that the terms of such financing will be favourable.

In March 2020 the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company at this time to predict the duration or magnitude of the impact of the pandemic towards the Company’s business or results from its operations.

2. BASIS OF PRESENTATION

Statement of Compliance

These condensed interim financial statements, including comparatives have been prepared in accordance with IAS 34, “Interim Financial Reporting” of the International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board (“IASB”), and Interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”). Accordingly, these condensed interim financial statements do not include all of the information and footnotes required by IFRS for complete financial statements for year-end reporting process. These condensed interim financial statements should be read in conjunction with the Company’s annual financial statements for the year ended March 31, 2020.

These condensed interim financial statements were authorized for issue by the Audit Committee and Board of Directors on August 30, 2020.

Basis of Measurement

These condensed interim financial statements have been prepared on a historical cost basis except for certain financial instruments as described in Note 12, which are stated at their fair value. In addition, these condensed interim financial statements have been prepared using the accrual basis of accounting except for cash flow information. These condensed interim financial statements are presented in Canadian dollars, which is also the Company’s functional currency.

3. SIGNIFICANT ACCOUNTING POLICIES

Use of estimates and measurement uncertainties

The preparation of financial statements in accordance with IFRS requires management to make estimates and assumptions that affect the measurements of assets, liabilities, revenues, expenses and certain disclosures reported in these financial statements. Significant estimates made by management include the following:

Valuation of stock options and share purchase warrants

Management uses the Black-Scholes option pricing model to determine the fair value of employee stock options and share purchase warrants issued for goods or services. This model requires assumptions of the expected future price volatility of the Company's common shares, expected life of options and warrants, future risk-free interest rates and the dividend yield of the Company's common shares.

Income taxes

Provisions for income and other taxes are based on management's interpretation of taxation laws, which may differ from the interpretation by taxation authorities. Such differences may result in eventual tax payments differing from amounts accrued. Reported amounts for deferred tax assets and liabilities are based on management's expectation for the timing and amounts of future taxable income or loss, as well as future taxation rates. Changes to these underlying estimates may result in changes to the carrying value, if any, or deferred income tax assets and liabilities.

Economic recoverability of exploration and evaluation assets

Management has determined that exploration and evaluation costs incurred which were capitalized have future economic benefits and are economically recoverable. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefits including geological and metallurgic information, history of conversion of mineral deposits to proven and probable reserves, scoping and feasibility studies, accessible facilities, existing permits and life of mine plans.

Mackie East, Mackie West and Doc claims

On April 6, 2016, the Company completed a definitive acquisition agreement with Tudor Holdings Ltd. involving the issuance of 30,000,000 common shares of the Company at a value of \$0.10 per share (issued) in exchange for rights to the Mackie Property located in the Skeena Mining Division of northwestern British Columbia. The 30,000,000 common shares were subject to an escrow agreement, under which the shares will be released over the next three years. The Mackie Property consists of three main claim groups: Mackie East, Mackie West and the Doc claims.

The Mackie East claims are subject to an option agreement, whereby the Company can acquire a 100% interest in the claims by making property payments totaling \$250,000 over the next three years (\$50,000 paid). The Mackie East claims are subject to a 2.5% net smelter return ("NSR") royalty.

The Mackie West claims are not subject to an underlying option agreement and will be wholly owned on completion of the acquisition agreement. There are no NSR royalties in respect of these claims.

The Doc claims were subject to an option agreement, whereby the Company would acquire a 100% interest in the claims by making property payments totaling \$2,000,000 over the next three years. The option agreement was amended in November 2016, such that the \$50,000 cash payment due in November 2016 was replaced by the issuance of 70,000 common shares of the Company to the optionor (issued with a value of \$38,500). The Doc claims are subject to a 2.5% NSR royalty. During the year ended March 31, 2018, the Company recorded a provision for write-down of \$1,113,738 to a carrying value of \$Nil related to the Doc claims.

In September 2018, the Company entered into an agreement (the "Amending Agreement") with the optionor amending certain payment terms of the original option agreement to acquire a 100% interest in the Doc claims. The Amending Agreement provides for the issuance of 150,000 common shares (issued with a value of \$36,000) (Note 8) of the Company in lieu of a cash payment of \$50,000 due on September 15, 2018 as well as an extension of the remaining scheduled payments.

As at March 31, 2019, the Company recorded a provision for write-down of \$47,776 related to the Doc property. During the year ended March 31, 2020, the Company terminated its option agreement on the Doc property.

During the year ended March 31, 2020, the Company entered into an agreement to amend the terms of a purchase and sale agreement dated September 15, 2015 (and assigned to the Company by Tudor Holdings Ltd. under an acquisition agreement dated April 6, 2016) (the "Mill Purchase Agreement").

Under the Mill Purchase Agreement, the vendor agreed to sell a 100% interest in certain mineral claims located in the Skeena Mining Division in the Province of British Columbia (the "Skeena Claims") for an aggregate purchase price of \$250,000. The Company and the vendor entered into an amending agreement, whereby the aggregate consideration required to purchase the Skeena Claims consists of 300,000 common shares (issued with a value of \$216,000), an aggregate sum of \$125,000 (paid) and the transfer by the Company to the vendor of a 100% interest in two mineral claims with the tenure numbers 1039253 and 1040402 owned by the Company.

5. EXPLORATION AND EVALUATION ASSETS (continued)**Treaty Creek Property**

On May 10, 2016, the Company entered into a joint venture agreement, under which it acquired a 60% interest in the Treaty Creek Property located in northwestern British Columbia by acquiring a 31% interest from American Creek Resources Ltd. ("American Creek"), which held a 51% stake, and a 29% interest from Teuton Resources Corp. ("Teuton"), which held a 49% interest. The Company acquired the combined 60% interest by issuing 500,000 common shares to each of American Creek and Teuton with a combined value of \$1,260,000 (issued). As part of the agreement, the Company agreed to complete a minimum of \$1,000,000 in exploration expenditures on the Treaty Creek Property during 2016 (completed). Pursuant to the agreement, the Company holds a 60% interest and each of American Creek and Teuton hold a 20% interest. Both American Creek's and Teuton's 20% interests are carried during the exploration period until a production notice is given, at which time they will each be responsible for 20% of the costs under and subject to the terms of the joint venture agreement. The Property is subject to 3% NSR royalties under the terms of the agreement and the Company is designated as operator of the joint venture.

Electrum Property

On May 10, 2016, the Company entered into a joint venture agreement, under which it acquired a 60% interest in the Electrum Property located in northwestern British Columbia from American Creek, by issuing 1,000,000 common shares with a value of \$1,260,000 (issued) and paying \$500,000 (paid). As part of the agreement, the Company also acquired 3,125,000 shares of American Creek by investing \$250,000 pursuant to a private placement, at a price of \$0.08 per American Creek share (Note 6). Under the terms of the agreement, the Company is designated as operator of the joint venture.

The Electrum Property comprises eight claims, of which six claims are subject to a 2% NSR royalty which can be purchased at any time for \$1,000,000.

On June 19, 2018 the Company entered into an option agreement to acquire the remaining 40% interest in the Electrum property from American Creek by making option payments of \$50,000 (paid) on signing of the agreement and \$2,650,000 on or before August 15, 2018. During the year ended March 31, 2019 the Company let the option to acquire the remaining 40% interest lapse.

During the period ended June 30, 2020, the Company completed the purchase of the remaining 40% interest in the Electrum Property from American Creek. The purchase price paid was \$250,000 cash and 1,400,000 of the Company's common shares, which are subject to a contractual 8 month hold period expiring February 16, 2021.

Eskay North Property

On May 10, 2016, the Company acquired a 100% interest in a single mining claim in the Skeena Mining Division of northwestern British Columbia, known as the Eskay North Property. As consideration for the claim, the Company issued 750,000 common shares over a twelve-month period (issued with a combined value of \$605,000). The Eskay North Property is subject to a 2.5% NSR royalty payable to the vendor.

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

As at June 30, 2020, the Company's financial instruments are comprised of cash, amounts receivable, investment, reclamation deposits, accounts payable and accrued liabilities and lease obligations. The fair values of these financial instruments approximate their carrying values due to their short-term maturity. Fair values of financial instruments are classified in a fair value hierarchy based on the inputs used to determine fair values. The levels of the fair value hierarchy are as follows:

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3 – Inputs that are not based on observable market data (unobservable inputs).

As at June 30, 2020, the fair value of cash and investments (Note 6) held by the Company was based on level 1 of the fair value hierarchy. The fair value of the Company's lease obligations approximate the carrying values as the contractual interest rates are comparable to current market interest rates.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its cash. The Company limits exposure to credit risk by maintaining its cash with large financial institutions. The Company does not have cash that is invested in asset backed commercial paper.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. As at June 30, 2020, the Company had cash of \$6,490,984 to settle current liabilities of \$1,298,135. All of the Company's current financial liabilities have contractual maturities of 30 days or are due on demand and are subject to normal trade terms.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and equity prices.

Interest rate risk

Interest rate risk arises from changes in market rates of interest that could adversely affect the Company. The Company's current exposure to interest rate risk is limited to its cash and cash equivalents yielding interest income at varying rates. The Company's interest obligations on its credit facility, loan payable and certain accounts payable balances, are fixed. The Company's current exposure to interest rate risk is insignificant.

Foreign currency risk

Foreign currency risk arises from fluctuations in foreign currencies versus the Canadian dollar that could adversely affect reported balances and transactions denominated in those currencies. The Company currently has no assets or liabilities and has nominal expenses denominated in a foreign currency, so it is not exposed to any significant foreign currency risk.

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

Equity price risk

Equity price risk arises from market fluctuations in equity prices that could adversely affect the Company's operations. The Company's current exposure to equity price risk is limited to declines in the values and volumes including those of its own shares, which could impede its ability to raise additional funds when required.

13. CAPITAL MANAGEMENT

Capital is comprised of the Company's shareholders' equity and any debt that it may issue. As at June 30, 2020, the Company's shareholders' equity was \$40,354,374. The Company's objectives when managing capital are to maintain financial viability and to protect its ability to meet its on-going liabilities, to continue as a going concern, to maintain creditworthiness and to maximize returns for shareholders over the long term. Protecting the ability to pay current and future liabilities includes maintaining capital above minimum regulatory levels, current financial strength rating requirements and internally determined capital guidelines and calculated risk management levels.

The Company's current capital was received from the issuance of common shares. The net proceeds raised to date will only be sufficient to identify and evaluate a limited number of assets and businesses. Additional funds may be required to finance the Company's future business opportunities.

The Company is not subject to any externally imposed capital requirements. There were no changes to the Company's approach to capital management during the three months ended June 30, 2020.

14. SUPPLEMENTAL DISCLOSURES WITH RESPECT TO CASH FLOWS

During the three months ended June 30, 2020
